

**Cesar Malavé**

Professor of Industrial Engineering and Assistant Dean for International Programs  
Texas A&M

Dr. Malavé is a Professor of Industrial Engineering and Assistant Dean for International Programs at Texas A&M. He earned a B.S. in Chemical Engineering and a M.S. in Operations Research from the Georgia Institute of Technology. He then obtained a Ph.D. in Industrial Engineering from the University of South Florida in Tampa. He has been with Texas A&M since 1987. Dr. Malavé's research interests are in the area of manufacturing systems analysis and planning. He teaches graduate courses and conducts research in the area of manufacturing systems modeling and control. At the undergraduate level, Dr. Malavé has taught the freshman introductory course in fundamentals of engineering, engineering economy, manufacturing operations analysis, and robotics. He is also the TAMU campus coordinator for the NSF sponsored Foundation Coalition. The Foundation Coalition is one of the engineering education coalitions dedicated to the innovation of undergraduate education. The main thrusts of the Foundation Coalition are integration of subject matter, active/collaborative learning, teaming, and continuous improvement through assessment and evaluation. Dr Malavé is a member of ASEE and IIE. In his capacity as Assistant Dean for International Programs in the Dwight Look College of Engineering, Dr. Malavé leads the Study Abroad Programs, international agreements and newly established Qatar campus.
